

## **Privacy Policy**

All personal information collected during AesonLabs Data Recovery services, including personal contact information and any information from your recovered data files, will not be shared with anyone outside of the AesonLabs Data Recovery facility. Any files and/or data will be shared only in the event that:

- a) your files contain evidence or supporting evidence for criminal activity that breaks Canadian Provincial and/or Federal Government laws
- b) we are officially summoned by any Regional, Provincial and/or Federal Government to share your retrieved data files and/or media

After the recovery process is complete, your media and data files will continue to remain privatized. You also reserve the right to request that any backups and/or saved data be erased (please note that in the event that a similar media failure occurs in the near future, we will not have an old backup).
